

Understanding Healthy Indiana Plan

Updated 09/09/2025

What is Medicaid?

Medicaid is a state and federally funded program that, among other things, provides health care coverage to eligible low-income people. There are several types of Medicaid programs. One of these is the **Healthy Indiana Plan**.

Healthy Indiana Plan

The **Healthy Indiana Plan (HIP)** is a managed health care program administered through Anthem, CareSource, MDwise, and MHS. You may qualify if you are aged 19 to 64 and are not eligible for Medicare or another Medicaid program.

HIP Plus serves people whose income is up to 138% of the Federal Poverty Level.* Copayments are not required for receiving health care services, except for using an emergency room when there is no true emergency.

HIP Basic serves people whose household income is less than 100% of the federal poverty level.* It does not include vision, dental, or chiropractic services. Copayments are required for all health care services.

*The Federal Poverty Level varies by household size.

138%: Households of one - \$21,597; two - \$29,187; three - \$36,777; four - \$44,367

100%: Households of one - \$15,650; two - \$21,150; three - \$26,650; four - \$32,150

How to Apply for Medicaid

You can apply in three ways:

- **Online:** Go to fssabenefits.in.gov or healthcare.gov.
- **In Person:** Visit your local Division of Family Resources (DFR) office. Find your office at in.gov/fssa/dfr.
- **By Phone:** Call DFR at 800-403-0864.
